Early *Annual Summaries*, published since 1891, give total number of losses for the year for steam and sailing vessels by flag and cause of loss. Later issues also include analyses by size, principal type and age (since 1967) and world maps showing approximate positions of ships foundered, burnt, wrecked and lost by collision during that year (since 1970). Since 1984 the *Returns* have been published annually.

Researchers should note that figures in Lloyd's Register's statistical publications for the years 1915 to 1918 and 1940 to 1947 are incomplete or not recorded at all.

The statistics are available for researchers to view free of charge in Lloyd's Register's Information Centre Library. Please call to arrange an appointment.

### 3. International Maritime Statistics Forum

<http://www.imsf.info/>

The International Maritime Statistics Forum (IMSF) has been in existence for over 25 years. Its objective is "to promote harmonisation and improvement in quality and scope of statistics within the international maritime industries, by means of ongoing work programmes and by affiliation with prominent national and international maritime institutions". The website contains statistical reports covering various maritime subjects, plus links to organizations producing maritime statistics across the world.
