

NOTES ON THE 1929-1930 EDITION OF LLOYD'S REGISTER BOOK.

The new edition of the Register Book issued by the Committee of Lloyd's Register of Shipping contains as usual very complete particulars of all the sea-going vessels of the world, of 100 tons and upwards, and in addition of the steel and iron vessels trading on the Great Lakes of North America, and of other vessels classed with the Society. It thus includes a full record of about 32,800 steamers, motorships and sailing vessels.

These bulky volumes comprise also many lists of great practical value to the shipping community, such as :—Signal letters assigned to all sea-going vessels ; Shipbuilders and Marine Engineers in all Countries ; detailed particulars of dry and wet docks, ports, harbours, etc., in each country ; telegraphic and postal addresses of about 20,000 firms connected with shipping in all parts of the world ; particulars of the speed of merchant vessels capable of 12 knots and upwards ; particulars of deadweight and cubic capacities of cargo steamers and motorships ; lists of bulk oil carriers ; complete lists of Shipowners and Managers all over the world, with the names and tonnages of their respective vessels, etc.

The Section of the Book which is perhaps of the greatest interest to the general public is that containing the Statistical Tables, giving extensive and accurate information respecting the various merchant fleets of the world. Special attention is drawn to the notice at the commencement of the Section, which defines with precision the bases on which the figures have been compiled, thus allowing of an exact comparison between the various countries as regards the number, material, description, size, age and type of the vessels owned.

The contents of the Tables will repay careful study, and the following summary of some of the results which are to be obtained by an analysis of these Tables, and by a comparison with similar Tables issued by Lloyd's Register in previous years, will be found of interest.

CLASSIFICATION OF VESSELS.

It is perhaps only right that before dealing with the other Statistical Tables special attention be drawn to the figures shown in Table No. 6 respecting the number and tonnage of vessels classed by Lloyd's Register of Shipping. The number and tonnage* of existing vessels recorded in the new edition of the Register Book (*including over 760,000 tons of new ships afloat in course of classification*) which are now or have been classed by the Society is 15,486 of 42,116,071 tons. Practically all these vessels were built under the inspection of the Surveyors of Lloyd's Register, the most convincing proof of the appreciation of the work of this Society.

That this appreciation is world-wide is well shown by the fact that of the tonnage actually holding the Society's class, 46½ per cent. is registered in Great Britain and Ireland and 53½ per cent. in other countries.

* The figures regarding tonnage of vessels throughout these Notes refer to gross tonnage.

The above Table shows that during the last twelve months there has been an increase in the steam and motor tonnage owned in the world of 1,247,980 tons, and a decrease in the sailing tonnage of 128,327 tons, making a total world *net* increase of 1,119,653 tons ; the net increase from June, 1927, to June, 1928, was 1,761,749 tons.

The countries showing the largest increases for the last twelve months are :—Germany (315,301 tons), Great Britain and Ireland (290,981 tons), and Norway (256,286 tons).

Amongst the principal maritime countries, only two show an appreciable decrease, viz. :—The United States (151,380 tons), and Italy (144,157 tons) ; in both cases this is due to the tonnage broken up since June, 1928, having been much higher than during the previous year.

COMPARISON OF STEAM AND MOTOR TONNAGE AT JUNE, 1914, AND JUNE, 1929.

Gross tonnage of Steamers and Motorships owned in the world as recorded in Lloyd's Register Book for the years 1914 and 1929.

TOTAL	45,404,000	66,408,000	+ 21,004,000

The net addition during the 15 years 1914–1929 amounts to 21 million tons, equal to 46½ per cent of the pre-war tonnage. It may be of interest to state that, during the 15 years 1899–1914, the net increase was 24,526,000 tons, equal to over 117 per cent of the steam tonnage in existence in 1899.

If a shorter period be taken for comparison it will be seen that while during the 5 years 1909–1914 the world increase (8,931,000 tons) amounted to 24½ per cent of the tonnage owned in 1909, during the five years, June, 1924, to June, 1929, the increase (4,893,000 tons) amounts to less than 8 per cent of the world tonnage at June, 1924, the average yearly increase being only 1·6 per cent.

As compared with 1914, the largest increases have taken place in the United States (9 million tons), and in Japan (2·5 million tons). Increases of over a million tons have also occurred in six other cases, namely, Italy (1,785,000 tons), Holland (1,460,000 tons), France (1,381,000 tons), Norway (1,261,000 tons), British Dominions (1,163,000 tons), and Great Britain and Ireland (1,154,000 tons).

The increase of tonnage belonging to Great Britain and Ireland represents only 6·1 per cent of the tonnage owned in 1914, whereas the increase of tonnage owned abroad represents nearly 75 per cent of the pre-war tonnage.

Notwithstanding an increase of 1,548,000 tons since June, 1923, Germany still shows a decrease of 1,077,000 tons as compared with June, 1914.

In 1914 there was owned in Great Britain and Ireland 41·6 per cent of the world's steam and motor tonnage, but owing to the great increase which has taken place since 1914 in the tonnage owned abroad, the percentage of 41·6 has now been reduced to 30·2. Similar percentages for the two years respecting the next seven leading countries are :—

	1914	1929		1914	1929
UNITED STATES (Sea)	4·5	16·6	NORWAY	4·3	4·85
JAPAN	3·8	6·3	ITALY	3·1	4·84
GERMANY	11·3	6·1	HOLLAND	3·2	4·4
FRANCE	4·2	4·97			

SAILING TONNAGE.

The reduction in sailing tonnage since pre-war times, say June, 1914, amounts to about 2,310,000 tons gross. The present percentage of sailing vessels to the world's total tonnage is under 2·5. Of the world's sailing tonnage, 890,219 tons—equal to 53·4 per cent of the total—are now owned in the United States, and the other countries which still have an appreciable amount of sailing tonnage are :—Great Britain and Ireland, 120,000 tons, Canada, 95,000 tons, France, 76,000 tons, Italy, 69,000 tons, and Finland 67,000 tons.

If barges which are generally towed, and other craft included in the sailing tonnage because not fitted with engines for self-propulsion, be excluded, the world tonnage of **real sailing vessels** only amounts to about 906,000 tons, of which 333,000 tons—equal to 36¾ per cent of the total—are owned in the United States, and only 17,800 tons in Great Britain and Ireland.

SIZE AND AGE OF STEAMERS AND MOTORSHIPS.

A considerable increase has taken place in recent years in the number of sea-going steamers and motorships of 4,000 tons each and above. In 1914 there were 3,608 such vessels, and now the number reaches 6,335, of which 425 are of 10,000 tons and above, including 59 of 20,000 tons each and upwards. Of the 425 vessels 237 are under the British flag. It may be noted that just under one half of the total number of steamers and motorships in existence are of less than 1,000 tons each.

Table No. 8 shows that of the motorships now in existence there are 744 of 4,000 tons and above. One hundred and twelve of them are of between 8,000 and 10,000 tons, and sixty are of 10,000 tons and upwards.

From Table No. 5, in which steamers and motorships are classified according to their size and age, it will be noticed that there are 3,167 vessels less than five years old with a tonnage representing 15·6 per cent of the total steam and motor tonnage. Vessels of 25 years and over amount to 8,033, but their tonnage is slightly less than that of the 3,167 newer vessels. Of the vessels built in 1904 or before, nearly 63 per cent are of less than 1,000 tons each and the average size of the others is 2,891 tons, while of the vessels built during the last five years only 37·3 per cent are of less than 1,000 tons each and the average of the others reaches 4,997 tons.

Of the 991 vessels of 8,000 tons and upwards now in existence, 259 have been built during the last five years.

Of the tonnage owned in Great Britain & Ireland 22·5 per cent is less than five years old. The only countries which have a larger proportion of new tonnage (less than five years old), are Norway with 27·2 per cent and Germany with 24 per cent. France, Japan and Spain have less than 9 per cent. Of the United States sea-going vessels only 3½ per cent are less than five years old, but for those trading on the Great Lakes the percentage rises to 6·6.

Of the principal maritime countries Greece has the least proportion of new vessels, only 2·4 per cent of the total tonnage being under 5 years old.

Of the tonnage registered in Great Britain and Ireland 83½ per cent is under 20 years old, while the percentage for the tonnage owned abroad is only 71.

The group of vessels with the largest aggregate of tonnage is that of between 4,000 and 6,000 tons each, amounting to 19,183,599 tons, equal to 28·9 per cent of the world's total steam and motor tonnage. The big liners, say those of 15,000 tons each and upwards, represent only 4½ per cent of the total tonnage; it may be added, however, that 55·4 per cent of the tonnage of these liners is owned in Great Britain and Ireland.

TYPE OF MACHINERY.

Table No. 3 shows the type of machinery used for the propulsion of vessels, and the following summary will not be without interest :—

The figures show the great development which has taken place in the use of steam turbine engines and of internal combustion engines. There are now 1,456 steamers of over 10 million tons fitted with turbine engines or a combination of steam turbines and reciprocating engines, and 3,246 vessels (including auxiliary vessels) of 6,628,102 tons, fitted with internal combustion engines, as compared with 730,000 tons and 220,000 tons respectively in 1914.

It may be stated that while during the last 12 months there has been an increase of 1,196,000 tons in the tonnage of motorships and of 363,000 tons in the tonnage of vessels fitted with steam turbines, the tonnage of steamers fitted solely with reciprocating steam engines has actually decreased by 311,000 tons.

The increase in the motorship tonnage at June 1929, as compared with June 1924 amounts to 4,652,000 tons.

An interesting feature is the comparatively large proportion of motor tonnage included in the merchant navies of some countries. While the total *motor* tonnage now owned in the world amounts only to 11·1 per cent of the *steam* tonnage (in Great Britain and Ireland 10·6 per cent), such percentage is much higher in the Scandinavian countries, viz.: Norway 42·7, Denmark 42·4, and Sweden 38·2. Amongst the principal maritime countries, Italy, Germany and Holland have the next highest proportions, viz.: 17·2, 17, and 15·2 per cent, respectively.

Of the principal countries the following have the lowest percentages of motor tonnage:—Spain 7·4, Japan 5·8; United States 4·3; France 2·1; and Greece 0·45.

An analysis of the type of machinery now employed also shows that there are recorded in Lloyd's Register Book 93 vessels, with a total tonnage of 839,082 tons (included in the above-mentioned totals for turbine vessels), which are fitted with a combination of steam turbines and reciprocating engines. Another interesting particular is that in the case of 60 vessels with a tonnage of 259,467 tons, a comparatively new system of propulsion has been adopted, viz.:—electric motors connected to the screw shaft, these motors being supplied with current from generators, which are driven either by steam turbines or oil engines. Of these vessels, 47 of 197,025 tons are owned in the United States, including 3 vessels of over 20,000 tons each.

Of the 29,612 steamers and motorships of 100 tons gross and upwards recorded in Lloyd's Register Book, 3,561 are twin screw vessels and 124 have triple or quadruple screws.

From Table No. 4, it will be seen that there are recorded in the new Register Book 3,787 steamers of 19,420,895 tons fitted for burning oil fuel, of which 829 of 5,413,962 tons are registered in Great Britain and Ireland and 1,793 of 8,799,433 tons are registered in the United States of America.

The above figures enable a comparison to be made between the respective employment of coal and oil fuel at the present time as compared with 1914.

	1914 % of total gross tonnage.	1929 % of total gross tonnage.
Sailing vessels and sea-going barges 8·06	2·45
Oil, etc., in internal combustion engines	... 0·45	9·73
Oil fuel for boilers 2·65	28·53
Coal 88·84	59·29
	100·00	100·00

It will thus be seen that less than 59½ per cent of the tonnage of the Merchant Marine now depends entirely upon coal, while in 1914 the percentage was nearly 89. It must of course be understood that oil is not always used in steamers fitted for burning oil fuel, as such installations can readily be replaced by coal-burning fittings should it happen that oil be unobtainable or its price render it unprofitable.

TYPE OF VESSELS.

The Tables show the total tonnage of certain types of vessels, which information is most useful in estimating the tonnage available for general cargo and passenger purposes. The tonnage of the 1,236 tankers, of 1,000 tons gross and upwards, amounts to 6,987,922 tons; 388 of 2,165,208 tons are registered in Great Britain and Ireland, and 381 of 2,374,358 tons are registered in the United States. In addition, there are 83,093 tons of tankers of less than 1,000 tons each. The tonnage of trawlers and other fishing vessels and whalers amounts to 910,404 tons. An analysis of the vessels recorded in the Register Book shows that 362,841 tons represent tugs and salvage vessels, and 791,679 tons steam barges, dredgers and similar craft, ferries, river vessels and vessels owned by Municipal Corporations or Harbour Authorities. Although few paddle vessels are now built, the total tonnage of such vessels in existence and recorded in Lloyd's Register Book still amounts to 334,763 tons.

It will thus be seen that, without taking into account size, age or material, there are nearly 9½ million tons of vessels which are not used for general cargo and passenger purposes.

**TONNAGE OF THE LARGER OCEAN-GOING STEAMERS AND MOTORSHIPS AVAILABLE
FOR GENERAL CARGO AND PASSENGER PURPOSES.**

If all vessels of the types mentioned in the preceding paragraph be omitted, and disregarding also

- (a) Vessels trading on the Great Lakes of North America,
- (b) Wood vessels,
- (c) Vessels of less than 5,000 tons gross, and
- (d) Vessels over 25 years old (with the exception of a few which although up to 30 years old are still capable of a high speed) and presumably of less efficiency than more modern vessels,

the following figures are obtained which indicate the relative position of the principal Maritime Countries of the World, as regards the larger ocean-going vessels available for general cargo and passenger purposes.

COUNTRIES.	TOTAL STEAM AND MOTOR TONNAGE IN TABLE I.		OCEAN-GOING TONNAGE AS DEFINED ABOVE.	
	Tonnage Owned.	Percentage of World Total.	Tonnage Owned.	Percentage of World Total.
GREAT BRITAIN AND IRELAND...	20,046,270	30·19	10,139,173	38·42
UNITED STATES	13,591,803	20·47	5,489,095	20·80
GERMANY 	4,057,657	6·11	2,083,739	7·89

OTHER COUNTRIES 	11,856,785	17·86	1,999,048	7·58
WORLD TOTAL 	66,407,393	100·00	26,393,282	100·00

The above Table shows the relatively high efficiency of the Merchant Fleet of Great Britain and Ireland, which, while comprising 30·19 per cent of the World tonnage as recorded in the Register Book, has actually 38·42 per cent of the more efficient ocean-going tonnage available for general cargo and passenger purposes.

Considerable differences are also shown as regards three other countries, viz.:—Holland and Germany—which from percentages of 4·42 and 6·11 respectively of the total tonnage, rise to 6·13 and 7·89 per cent of the larger ocean-going tonnage, and on the other hand Norway, which from 4·84 per cent is reduced to 1·88 per cent.

TONNAGE OWNED IN THE WORLD AT VARIOUS DATES.

Another Table, most useful for the purpose of ascertaining the development of the Merchant Navies during the last thirty-five years, is Table No. 10, which shows for each of the years 1895–1929 the number and the gross tonnage of the steamers and motorships, and of the sailing vessels, owned in the world distinguishing also the principal Maritime Countries.

From this Table some remarkable variations can be observed. In 1895 the *gross* tonnage of steamers amounted to 16,888,000 tons, and the *gross* tonnage of sailing vessels to about 8,850,000 tons. The steam and motor tonnage has increased by over 49½ million tons, while the sailing tonnage has decreased by 7,183,000 tons. Apart from the enormous increase which has taken place in the United States sea-going steam tonnage and the decrease in the German tonnage, both due to the War, the following are the most noticeable changes during this period of 35 years.

The sail tonnage registered in Great Britain and Ireland and in Norway, which in 1895 amounted to about 2,614,000 tons gross and 1,308,000 tons gross respectively, is now reduced to 120,061 and 6,698 tons respectively.

The increase in the steam and motor tonnage owned in Great Britain and Ireland amounts to 10,350,000 tons. The most remarkable development has taken place in Japan, the steam tonnage of which country now reaches a figure equal to nearly 15 times the total owned in 1895. The present steam tonnages of Greece, Holland and Italy are over 9 times, that of Norway over 7 times, and that of Sweden over 6 times as great as in 1895.

TONNAGE LOST AND BROKEN UP.

The Statistical Tables include a Table (No. 14) showing the tonnage of steamers and motorships lost and broken up each year, from 1905 onwards. As regards losses one point deserves special mention, and that is the considerable decrease in the percentage lost during the last five years as compared with other quinquennial periods in pre-war times. The average yearly percentage of steam tonnage lost during the years 1924-28 only amounts to 0·70 per cent, while for instance, during the years 1909-13 the average was nearly 1·17 per cent. These figures may, of course, to some extent be influenced by the large amount of tonnage laid up during recent times.

The figures for steamers broken up vary to an enormous extent from year to year. During the period 1905-1909 the minimum was 120,003 tons, and the maximum 251,900 tons; during 1910-1914 the variation is from 87,737 tons to 245,891 tons. During the years 1915-1920 practically no tonnage was broken up, the yearly average only amounting to 10,000 tons. Quite different conditions are shown for recent years. During 1921 the tonnage broken up amounted to 77,500 tons; it increased to 315,000 tons for 1922; to 963,000 tons for 1923; and for the year 1924 the total reached 1,174,000 tons. The tonnage broken up during 1925 amounted to 653,000 tons, and to 799,000 tons during 1926, but during the year 1927 the vessels broken up only amounted to 403,000 tons. The figures for 1928 show an increase, having reached 736,000 tons.

It is obvious that the tonnage broken up has an important bearing on the shipping position, and that if the amount of tonnage thus disposed of had been continued for some years on the high level reached in 1923 and 1924, it would have gone a long way towards solving the problems that confront shipowners.

Of the total tonnage broken up during the six years 1923-1928—4,727,000 tons—1,118,000 tons were registered in Great Britain and Ireland; 1,579,000 tons in the United States; 585,000 tons in Italy; and 506,000 tons in France.

Although the average percentage of tonnage broken up during this period to the total tonnage owned is less for Great Britain and Ireland than for the tonnage owned abroad, this difference is easily accounted for by the fact that a considerable number of the older vessels are purchased from Great Britain and Ireland by other countries, the result being that while of the tonnage now owned in Great Britain and Ireland less than 17 per cent. consists of vessels of 20 years of age and above, the tonnage owned abroad comprises 29 per cent. of vessels 20 years old and over.

GENERAL NOTES ON THE STATISTICAL TABLES.

These Tables are based throughout on the *Gross tonnage*.

Motorships are included in the figures indicated for steamers, unless shown separately, as in Tables 1, 3, 8, 11 and 12.

Sailing vessels fitted with auxiliary power are included in the figures indicated for steamers or motorships, according to the type of the auxiliary engines.

Reinforced Concrete vessels are included in the figures shown for steel.

The Register Book includes a certain number of vessels which, although not actually completed at the date of printing, are expected to be completed in the near future.

Steamers and Motorships of less than 100 tons gross, and Sailing vessels of less than 100 tons net, are not included, except in Tables 6, 7 & 9.

Vessels trading on the Caspian Sea, and *Wood* or *Composite* vessels trading on the Great Lakes of North America, are not included.

In the absence of satisfactory information, the records of most of the Sailing vessels belonging to Greece, Turkey, and Southern Russia, are omitted from the Register Book, and for this reason none are included in these Tables.

Sailing vessels owned in Japan are not recorded in Lloyd's Register Book, and therefore do not appear in the Tables.

Under the heading of "Country not stated" are included all vessels which are entered in the Register Book without record of flag owing to no definite information having been received up to the time of going to press.

NOTES GÉNÉRALES RELATIVES AUX TABLEAUX STATISTIQUES.

Tous ces Tableaux sont basés sur le tonnage brut.

Les navires à moteurs sont inclus dans les chiffres indiqués pour les vapeurs, à moins qu'ils ne soient montrés séparément, comme dans les Tableaux 1, 3, 8, 11 et 12.

Les navires à voiles munis de machines auxiliaires sont compris dans les chiffres indiqués pour les vapeurs ou navires à moteurs, suivant le type des machines auxiliaires.

Les navires en béton armé sont inclus dans les chiffres des navires en acier.

Le Register Book comprend un certain nombre de navires qui n'étaient pas encore achevés à l'époque de l'impression de l'ouvrage, mais dont on prévoit l'achèvement prochain.

Les vapeurs et navires à moteurs d'un tonnage brut inférieur à 100 tonneaux et les voiliers d'un tonnage net inférieur à 100 tonneaux, ne sont pas compris dans ces Tableaux, exception faite des Tableaux 6, 7 et 9.

Les navires naviguant sur la Mer Caspienne, et les navires *en bois* ou *composite* naviguant sur les grands lacs de l'Amérique du Nord, ne sont pas compris dans ces Tableaux.

En l'absence de renseignements authentiques, la plupart des voiliers appartenant à la Grèce, à la Turquie et au sud de la Russie, n'ont pas été inclus dans le "Lloyd's Register Book"; conséquemment, aucun d'eux n'a été inclus dans ces Tableaux.

Les navires à voiles appartenant au Japon ne figurent pas au "Lloyd's Register Book"; par suite ils ne figurent pas dans les Tableaux.

Sous l'en-tête "Country not stated" (Pays non indiqué) sont compris tous les navires qui figurent au "Lloyd's Register Book" sans indication de pavillon, vu que des renseignements positifs à ce sujet ne se trouvaient pas en possession de la Société à l'époque de l'impression de l'ouvrage.
