

STATISTICAL NOTES ON THE 1937-1938 EDITION OF LLOYD'S REGISTER BOOK.

Lloyd's Register Book for 1937-8 has now been issued to Subscribers by the Committee of Lloyd's Register of Shipping. The new edition is the 104th annual issue since the Re-Constitution of the Society, and contains, as usual, very complete particulars of all sea-going merchant vessels of the world of 100 tons and upwards, and also of steel and iron vessels trading on the Great Lakes of North America, and of other vessels classed with the Society. It includes a detailed record of upwards of 31,000 steamers, motorships, sailing vessels and non-propelled craft.

The impressive volumes comprise also many lists of great practical value to the shipping community, such as :—Shipowners and Managers all over the world, with the names and tonnages of their respective vessels; Shipbuilders in all countries, with lists of iron and steel vessels built by them, and Makers of Marine Machinery or Boilers in all countries; detailed particulars of dry and wet docks, ports, harbours, etc., in each country; telegraphic and postal addresses of some 20,000 firms connected with shipping in all parts of the world; steamers and motorships of 10,000 tons and upwards, arranged according to nationality and gross tonnage; particulars of the speed of merchant vessels capable of 12 knots and upwards; particulars of deadweight and cubic capacities of cargo steamers and motorships; lists of vessels carrying oil in bulk; lists of vessels fitted with refrigerating appliances, etc.; list of former names of vessels; index to vessels having compound names; and others.

The Section of the Book which is probably of most general interest to the public is that containing the **Statistical Tables**, which give extensive and precise information respecting the various **Merchant Fleets of the World**. These Tables have been published annually since 1886, with the exception of the years 1917 and 1918, when owing to restrictions imposed by Government censorship during the Great War their compilation was impracticable. The present issue is, therefore, the **Fiftieth Edition** of these valuable **Statistics**.

The contents of the Tables will repay careful study, as they enable an accurate comparison to be made of the number, material, description, size, age and type of vessels owned in the various countries. Special attention should be given to the notice at the beginning of the Section, wherein are defined the bases upon which the figures have been compiled.

The following summary of an analysis of the Tables, and comparison with similar Tables issued by Lloyd's Register in previous years, is of considerable interest.

CLASSIFICATION OF VESSELS.

Before dealing with the other Statistical Tables, particular attention is drawn to the figures shown in Table No. 6 regarding **Vessels Classed by Lloyd's Register of Shipping**. The number and tonnage* of existing vessels recorded in the new edition of the Register Book which are now or have formerly been Classed by the Society, or for which Classification or Re-Classification is contemplated, is 14,303 of 41,082,098 tons. Practically all these vessels have been built under the inspection of the Surveyors of Lloyd's Register. Of the tonnage actually holding the Society's class, 42·9 per cent. is registered in Great Britain and Ireland and 57·1 per cent. in other countries.

* The figures regarding tonnage of vessels throughout these Notes refer to gross tonnage.

The Tables show that during the last twelve months there has been a decrease in the steam tonnage owned in the world of 191,559 tons, an increase of 1,458,114 tons in the motor tonnage, and a decrease in the tonnage of sailing vessels and non-propelled craft of 44,174 tons, making a *net* increase of 1,222,381 tons in the total tonnage for the world. Between June, 1935, and June, 1936, there was a *net* increase of 177,671 tons.

The countries showing notable increases for the last twelve months are:—Norway (293,127 tons); Japan (259,420 tons); Great Britain & Ireland (258,482 tons); Germany (218,824 tons); Holland (123,040 tons); Italy (114,475 tons); China (108,406); Panama (83,008 tons); Finland (67,662 tons); and Greece (54,585 tons). Owing to the difficulty experienced in obtaining precise information in the case of Soviet Russia, the figures given for that country may not be comprehensive.

The largest decreases amongst the principal maritime countries are the following, viz.:—France (132,206 tons); Spain (102,655 tons) and United States of America—Sea (100,275 tons).

The preceding Table shows that from June, 1914, to June, 1925, the net increase in the world's steam and motor tonnage was 16,976,000 tons, equal to 37·4 per cent. of such tonnage in existence in 1914, and that the net addition since 1925 amounts to 2,891,000 tons, equal to 4·6 per cent. of the tonnage at 1925.

A comparison of the figures for 1914 and 1925 shows that the largest increases took place in the United States—Sea (9,905,000 tons), Japan (2,212,000 tons), Italy (1,501,000 tons) France (1,398,000 tons), and Holland (1,116,000 tons). The only decrease during this period was that in the case of Germany (2,129,000 tons).

Since 1925, the largest increases have taken place in Norway (1,729,000 tons), Greece (960,000 tons), Germany (922,000 tons), Japan (555,000 tons), British Dominions (359,000 tons), Italy (243,000 tons), and Sweden (240,000 tons). On the other hand, the tonnage of the United States (Sea) has decreased by 2,585,000 tons, that of Great Britain and Ireland by 1,869,000 tons, that of France by 476,000 tons, and that of Spain by 99,000 tons.

Since June, 1914, there has actually been a *net* decrease in the steam and motor tonnage belonging to Great Britain and Ireland of 1,456,000 tons, or 7·7 per cent. of the tonnage owned in 1914, whereas the aggregate increase of tonnage owned in other countries during the same period represents more than 80 per cent. of the pre-war tonnage owned abroad.

Notwithstanding increases of 2,352,000 tons from June, 1921, to June, 1925, and of 922,000 tons since June, 1925, the present totals for Germany are still 1,207,000 tons below those for June, 1914.

The present century has witnessed unprecedented development in the mercantile fleets of the world, the steam and motor tonnage having increased from 24,008,883 tons in 1901 to 65,271,440 tons in 1937. The concurrent increase in the tonnage owned abroad is indicated in the following Table, comprising the eight leading countries :—

Country.	Percentage of Steam and Motor Tonnage owned in the World.			Country.	Percentage of Steam and Motor Tonnage owned in the World.		
	1901	1914	1937		1901	1914	1937

					4·9
					4·4
					4·2
					4·1
					2·1
					3·2

Of these leading countries it will be seen that, apart from Great Britain and Ireland, France was the only one to show a decrease in the proportion of tonnage owned during the period 1901–1914, and that since 1914 Great Britain & Ireland and Germany alone show a decrease.

TONNAGE OF SAILING VESSELS, NON-PROPELLED BARGES, ETC.

The reduction in the tonnage of sailing vessels and non-propelled barges, etc., since pre-war times, say June, 1914, amounts to about 2,950,000 tons gross. The present proportion of such tonnage to the world's total tonnage is little more than 1·5 per cent. Of the world's tonnage of such sailing vessels and barges, 548,000 tons (54·0 per cent. of the total) are now under the United States flag, and the other countries which still have an appreciable amount of similar tonnage are: Great Britain and Ireland, 108,000 tons ; Canada, 80,000 tons ; Finland, 43,000 tons ; Italy, 39,000 tons ; and France, 27,000 tons.

If barges, the majority of which are generally towed, and other craft included in the sailing tonnage because not fitted with engines for self-propulsion, be excluded, the world tonnage of sailing vessels amounts only to some 307,000 tons, of which 76,000 tons (24·8 per cent. of the total) are owned in the United States, 43,000 tons are owned in Finland, 38,000 tons in Italy, 23,000 tons in Canada (Coast), 15,000 tons in France, 14,000 tons in Portugal, and only 14,000 tons in Great Britain and Ireland. It may be of interest to state that there are still recorded in the Register Book 6 sailing vessels of between 3,000 and 3,200 tons gross each.

SIZE AND AGE OF STEAMERS AND MOTORSHIPS.

A considerable increase has taken place in recent years in the number of *sea-going* steamers and motorships of 4,000 tons and above. In 1914 there were 3,608 such vessels, and now the number reaches 6,582, of which 514 are of 10,000 tons and above, including 76 of 20,000 tons each and upwards. Of the 514 vessels, 241 are under the British flag.

It may be noted that over one-half of the total number of steamers and motorships recorded in Lloyd's Register Book are of less than 1,000 tons each.

Table No. 8 shows that of the motorships now in existence in the world there are 1,517 of 4,000 tons and above. Three hundred and twenty-four of them are between 8,000 and 10,000 tons each, and 171 are of 10,000 tons and upwards.

From Table No. 5, in which steamers and motorships are classified according to their size and age, it will be noticed that there are 2,899 vessels less than five years old, with a tonnage representing 9·9 per cent. of the total steam and motor tonnage. Vessels of 25 years and over amount to 9,376, with an average tonnage of 1,305 tons, compared with 2,219 tons for those under five years of age.

Of the 1,238 vessels of 8,000 tons and upwards now in existence, 217 have been built during the last five years.

Of the tonnage owned in Great Britain and Ireland, 14·5 per cent. is less than five years old. Of the principal maritime countries abroad those having the largest proportion of new tonnage (less than five years old), are Japan with 18·3 per cent., Norway with 17·9 per cent., Australia and New Zealand together, with 17·6 per cent., Denmark with 13·0 per cent., Germany with 12·7 per cent., Holland with 12·3 per cent., and France with 11·0 per cent. On the other hand, Sweden has but 8·1 per cent., and Spain, 4·3 per cent., while of the United States sea-going tonnage 2·3 per cent., of Italian tonnage, 1·4 per cent., and of Greek tonnage only 1·0 per cent. is under five years old.

Of the tonnage registered in Great Britain and Ireland, 80·7 per cent. is *under* 20 years old and 57·5 per cent. is *under* 15 years old; while the corresponding percentages for the tonnage owned abroad are 67·3 and 34·7 per cent.

The size-group of vessels with the largest aggregate of tonnage is that from 4,000 to 6,000 tons each, comprising 17,641,032 tons, equal to 27·0 per cent. of the world's total steam and motor tonnage. Vessels of 15,000 tons each and upwards represent only 5·7 per cent. of the total tonnage; it may be noted, however, that upwards of 45 per cent. of such tonnage is registered in Great Britain and Ireland.

TYPE OF MACHINERY.

Table No. 3 gives particulars of the number and gross tonnage of steamers and motorships according to the type of machinery used for their propulsion, and the following summary is of interest:—

The figures show the extent of the great development which has taken place in the use of steam turbine engines and of internal combustion engines. There are now 1,743 steamers of 11,747,788 tons fitted with turbine engines or a combination of steam turbines and reciprocating engines, and 6,763 vessels (including auxiliary vessels) of 18,748,713 tons, fitted with internal combustion engines, as compared with 730,000 tons and 234,000 tons respectively in 1914.

While during the last twelve months there has been an increase of 1,458,000 tons in the tonnage of motorships, and of 193,000 tons in the tonnage of vessels fitted with steam turbines, there has been a reduction of 619,000 tons in steamers fitted solely with reciprocating steam engines. Since June, 1925, there has been an increase of 11,035,000 tons in the motorship tonnage.

It will be observed that of 9,957,140 tons of Oil Tankers, excluding vessels of less than 1,000 tons gross, 5,199,870 tons are steamers and 4,757,270 tons are vessels fitted with internal combustion engines.

Although the total motor tonnage amounts only to 20·7 per cent. of the aggregate tonnage owned in the world, and, in the case of Great Britain and Ireland, to 21·3 per cent. of the tonnage registered there, the highest percentages among the principal maritime countries are to be found in the following, viz.: Norway 56·0, Denmark 48·7, Sweden 39·8, and Holland 38·9; whereas Greece, the United States and France have the smallest proportions of motor tonnage, viz.: 0·7, 5·9 and 11·3 per cent. respectively.

An analysis of the type of machinery now employed also shows that there are recorded in Lloyd's Register Book 500 vessels, with a total tonnage of 2,446,407 tons which are fitted with a combination of steam turbines and reciprocating engines. Another interesting particular is that in the case of 104 vessels, with a tonnage of 612,387 tons, electric propulsion has been adopted, the motors being supplied with current from generators which are driven either by steam turbines or oil engines. It may be added that auxiliary electric drive has also been adopted in a number of other cases. Of the 104 vessels mentioned above, 59 of 286,571 tons are owned in the United States. Of vessels exceeding 20,000 tons gross in which electric propulsion is employed, five fly the British flag, two are owned in the United States, and one is owned in France.

Of the 29,524 steamers and motorships of 100 tons gross and upwards recorded in Lloyd's Register Book, 3,736 are twin-screw vessels, and 109 have triple or quadruple screws.

Although few paddle steamers are now built, there are still in existence and recorded in Lloyd's Register Book 307 such vessels, of 232,550 tons.

COAL AND OIL FUEL.

From Table No. 4, it will be seen that there are recorded in the new Register Book 3,932 steamers of 19,775,821 tons fitted for burning oil fuel, of which 791 of 5,069,596 tons are registered in Great Britain and Ireland, and 1,499 of 7,782,576 tons are registered in the United States of America.

The above figures, in conjunction with those given in the preceding section, enable a comparison to be made between the respective employment of coal and oil fuel at the present time as compared with 1914.

	1914 % of total gross tonnage.	1937 % of total gross tonnage.
Coal	88·84	47·89
Oil fuel for boilers	2·65	29·84
Oil, etc., in internal combustion engines	0·45	20·74
Sailing vessels, non-prop. barges, etc.	8·06	1·53
	100·00	100·00

It will thus be seen that less than 50 per cent. of the tonnage of the World's Merchant Marine now depends entirely upon coal, while in 1914 the percentage was nearly 89. The tonnage of steamers using coal which in 1914 reached 43,860,000 tons is now 31,747,000 tons, or, more than 12 million tons less.

It should, of course, be understood that oil is not necessarily always used in steamers fitted for burning oil fuel, as in a number of cases coal-burning fittings can readily be substituted when occasion demands the use of coal in preference to oil.

TYPE OF VESSELS.

The Tables show the total tonnage of certain types of vessels, and this information is of great service in enabling an estimate to be made of the tonnage available for *general cargo and passenger purposes*. The tonnage of the 1,558 oil tankers, of 1,000 tons gross and upwards, amounts to 9,957,140 tons;

394 of 2,533,494 tons are registered in Great Britain and Ireland, 394 of 2,575,199 tons are registered in the United States, and 250 of 1,856,250 tons in Norway. In addition, there are 128,425 tons of tankers of less than 1,000 tons each. The tonnage of steam and motor trawlers and other fishing vessels and whalers amounts to 1,153,789 tons. An analysis of the vessels recorded in the Register Book shows that 405,297 tons represent tugs and salvage vessels; ferries amount to 299,186 tons; cable vessels to 70,524 tons; while river vessels and vessels owned by Municipal Corporations or Harbour Authorities, and steam barges, dredgers and similar craft, amount to 499,065 tons.

It will thus be seen that, without taking into account size, age or material, there are about 12,500,000 tons of vessels which are not used for ordinary cargo and passenger purposes.

TONNAGE OF OCEAN-GOING STEAMERS AND MOTORSHIPS AVAILABLE FOR GENERAL CARGO AND PASSENGER PURPOSES.

If all vessels of the types mentioned in the preceding paragraph be omitted, and disregarding also

(a) Vessels trading on the Great Lakes of North America,

(b) Wooden and composite vessels,

(c) Vessels of less than 4,000 tons gross, and

(d) Vessels over 25 years old (*with the exception of a few which exceed that age but are still capable of a high speed*) and presumably of less efficiency than more modern vessels,

the following figures are obtained which indicate the relative position of the principal maritime countries as regards the more efficient ocean-going vessels available for general cargo and passenger purposes.

WORLD TOTALS	65,271,440	100·00	30,009,808	100·00

The above Table shows the relatively high efficiency of the merchant fleet of Great Britain and Ireland, which, while including 26·71 per cent. of the world steam and motor tonnage as recorded in the Register Book, actually comprises 35·93 per cent. of the more efficient ocean-going tonnage available for general cargo and passenger purposes.

Considerable differences are also shown as regards four other countries, viz.: Germany, Italy and France—which, from percentages of 6·02, 4·86 and 4·36 respectively of the total tonnage, rise to 7·61, 6·06 and 5·35 per cent. of the ocean-going tonnage as defined above—and on the other hand Norway, which from 6·66 per cent. is reduced to 3·55 per cent. This reduction is, of course, due to the very large proportion of oil tanker tonnage included in the Norwegian merchant marine, such tonnage being deducted for the purposes of the second part of this Table.

TONNAGE OWNED IN THE WORLD AT VARIOUS DATES.

Another Table, clearly illustrating the development of the Merchant Navies during the last thirty-five years, is Table No. 10, which shows for each of the years 1903-1937 the number and the gross tonnage of the steamers and motorships, and of the sailing vessels, owned in the world, distinguishing also the principal maritime countries.

From this Table some remarkable variations can be observed. In 1903 the gross tonnage of steamers amounted to 27,183,000 tons, and the gross tonnage of sailing vessels to about 6,767,000 tons. Since then, the steam and motor tonnage has increased by about 38 million tons, while the sailing tonnage has decreased by more than five-and-three-quarter million tons. Apart from the enormous increase which has taken place in the United States sea-going steam and motor tonnage since 1916, and the decrease, during the period 1914-1921, in the German tonnage, both due to the War, the following are the most noticeable changes during the thirty-five years:—

The sail tonnage registered in Great Britain and Ireland and in Norway, which in 1903 amounted to about 1,597,000 tons gross and 776,000 tons gross respectively, is now reduced to about 108,000 tons (mostly non-propelled barges, etc.) and 800 tons, respectively.

The increase in the steam and motor tonnage owned in Great Britain and Ireland amounts to 4,025,000 tons. As compared with 1903, the most notable increases in steam and motor tonnage owned—other than in the case of the United States—are shown at the present time by the following five countries, viz.: Japan, with a tonnage now equal to 7·6 times the earlier figures; Greece, 5·7 times; Norway, 4·6 times; Italy, 4·5 times; and Holland, 4·3 times.

TONNAGE LOST AND BROKEN UP.

The Statistical Tables include one (No. 14) showing the tonnage of steamers and motorships lost and broken up in each calendar year from 1913 onwards. As regards losses one point deserves special mention, and that is the considerable decrease in the percentage lost during the last five years as compared with the pre-war quinquennial period. The average yearly percentage of steam and motor tonnage lost during the years 1932-36 amounts only to 0·52 per cent., whereas during the years 1909-13, for instance, the average was 1·17 per cent. Apart from the improvement in means of communication and safety appliances generally, these figures may, of course, be influenced to some extent by the large amount of tonnage laid up during recent times.

The figures for steamers and motorships broken up vary to a very large extent from year to year. During the period 1905-1914 the minimum was 87,737 tons, and the maximum 251,900 tons. During the years 1915-1920 practically no tonnage was broken up, the yearly average only amounting to 10,000 tons. Quite different conditions are shown for recent years. During 1921 the tonnage broken up amounted to 77,500 tons; it increased to 315,000 tons for 1922, and to 963,000 tons for 1923, since which year it has kept at a high level with the exception of the year 1927. From 1930 the figure rose sharply until 1933, when the two-million mark was passed. During the last three years the totals have decreased, and although the 993,904 tons broken up during 1936 is still very considerable, it is 535,000 tons less than the yearly average for the last five years, and 165,000 tons less than that for the ten-year period 1927-36.

The aggregate steam and motor tonnage broken up during these ten years—11,594,000 tons—represents a yearly average of 1·8 per cent. of the tonnage owned. Adding to these figures the tonnage of steamers and motorships lost through casualties during the same period—3,783,000 tons—it will be seen that the average wastage of sea-going merchant tonnage (excluding sailing vessels) is less than 2·5 per cent. per year of the tonnage owned.

The total figures for tonnage broken up during the ten years include 3,738,000 tons registered in Great Britain and Ireland; 1,965,000 tons in the United States (excluding Lake vessels); 1,243,000 tons in Italy; 887,000 tons in France; 606,000 tons in Germany; and 584,000 tons in Japan.

As regards Great Britain and Ireland the tonnage broken up during this period represents a yearly average of 2·0 per cent. of the tonnage owned, as compared with 1·7 per cent. in respect of tonnage owned abroad. It is to be noted, further, that of the tonnage now owned in Great Britain and Ireland only 19·3 per cent. consists of vessels of 20 years of age and above, whereas of the tonnage owned abroad 32·7 per cent. consists of vessels of such age.

These Tables are based throughout on the *Gross* tonnage.

Steamers and Motorships of less than 100 tons *gross*, and Sailing vessels of less than 100 tons *net*, are not included, except in Tables 6, 7, & 9.

Sailing vessels fitted with auxiliary power are included in the figures indicated for Steamers or Motorships, according to the type of the auxiliary engines.

Reinforced Concrete vessels are included in the figures shown for steel.

Vessels trading on the Caspian Sea, *Wood* or *Composite* vessels trading on the Great Lakes of North America, and Sailing vessels owned in Japan, Greece, Turkey, and Southern Russia, are not recorded in Lloyd's Register Book, and therefore do not appear in the Tables.

Under the heading of "Country not stated" are included all vessels which are entered in the Register Book without record of flag owing to definite information not having been received up to the time of going to press.

NOTES GÉNÉRALES RELATIVES AUX TABLEAUX STATISTIQUES.

Tous ces Tableaux sont basés sur le tonnage *brut*.

Les vapeurs et navires à moteurs d'un tonnage *brut* inférieur à 100 tonneaux et les voiliers d'un tonnage *net* inférieur à 100 tonneaux, ne sont pas compris dans ces Tableaux, exception faite des Tableaux 6, 7, et 9.

Les navires à voiles munis de machines auxiliaires sont compris dans les chiffres indiqués pour les vapeurs ou navires à moteurs, suivant le type des machines auxiliaires.

Les navires en béton armé sont inclus dans les chiffres des navires en acier.

Le "Register Book" comprend un certain nombre de navires qui n'étaient pas encore achevés à l'époque de l'impression de l'ouvrage, mais dont on prévoit l'achèvement prochain.

Les navires naviguant sur la Mer Caspienne, les navires *en bois ou composite* naviguant sur les grands lacs de l'Amérique du Nord et les navires à voiles appartenant au Japon, à la Grèce, à la Turquie et au sud de la Russie, ne figurent pas au "Lloyd's Register Book"; par suite ils ne figurent pas dans les Tableaux.

Sous l'en-tête "Country not stated" (Pays non indiqué) sont compris tous les navires qui figurent au "Lloyd's Register Book" sans indication de pavillon, vu que des renseignements positifs à ce sujet ne se trouvaient pas en possession de la Société à l'époque de l'impression de l'ouvrage.
