

Lloyd's Register of Shipping.

STATISTICAL NOTES ON THE 1938-1939 EDITION OF LLOYD'S REGISTER BOOK.

Lloyd's Register Book for 1938-9 has now been issued to Subscribers by the Committee of Lloyd's Register of Shipping. The new edition contains, as usual, very complete particulars of all sea-going merchant vessels of the world of 100 tons and upwards, and also of steel and iron vessels trading on the Great Lakes of North America, and of other vessels classed with the Society. It includes a detailed record of more than 31,000 steamers, motor ships, sailing vessels and non-propelled craft.

The impressive volumes comprise also many lists of great practical value to the shipping community, such as:—Shipowners and Managers all over the world, with the names and tonnages of their respective vessels; Shipbuilders in all countries, with lists of iron and steel vessels built by them, and Makers of Marine Machinery or Boilers in all countries; detailed particulars of dry and wet docks, ports, harbours, etc., in each country; telegraphic and postal addresses of some 20,000 firms connected with shipping in all parts of the world; steamers and motorships of 10,000 tons and upwards, arranged according to nationality and gross tonnage; particulars of the speed of merchant vessels capable of 12 knots and upwards; particulars of deadweight and cubic capacities of cargo steamers and motorships; lists of vessels carrying oil in bulk; list of vessels fitted with refrigerating appliances; list of refrigerated meat stores, etc.; list of former names of vessels; index to vessels having compound names; and others.

The Section of the Book which is probably of most general interest to the public is that containing the **Statistical Tables**. These Tables, which were first published in 1886, give extensive and precise information respecting the various **Merchant Fleets of the World**, and form a very valuable series of statistical data.

The contents of the Tables will repay careful study, as they enable an accurate comparison to be made of the number, material, description, size, age and type of vessels owned in the various countries. Special attention should be given to the notice at the beginning of the Section, wherein are defined the bases upon which the figures have been compiled.

The following summary of an analysis of the Tables, and comparison with similar Tables issued by Lloyd's Register in previous years, is of considerable interest.

CLASSIFICATION OF VESSELS.

Before dealing with the other Statistical Tables, particular attention is drawn to the figures shown in Table No. 6 regarding **Vessels Classed by Lloyd's Register of Shipping**. The number and tonnage* of existing vessels recorded in the new edition of the Register Book which are now or have formerly been Classed by the Society, or for which Classification or Re-Classification is contemplated, is 14,356 of 41,914,793 tons. Practically all these vessels have been built under the inspection of the Surveyors of Lloyd's Register. Of the tonnage actually holding the Society's class, 47.6 per cent. is registered under the British flag (42.9 per cent. in Great Britain and Ireland, and 4.7 per cent. in British Dominions, Colonies, etc.) and 52.4 per cent. in other countries.

*The figures regarding tonnage of vessels throughout these Notes refer to gross tonnage.

The Tables show that during the last twelve months there has been an increase in the steam tonnage owned in the world of 114,471 tons, an increase of 1,484,240 tons in the motor tonnage, and a decrease in the tonnage of sailing vessels and non-propelled craft of 38,224 tons, making a *net* increase of 1,560,487 tons in the total tonnage for the world. Between June, 1936, and June, 1937, there was a *net* increase of 1,222,381 tons.

The countries showing notable increases for the last twelve months are:—Japan (531,602 tons); Germany (306,594 tons); Norway (266,393 tons); Great Britain & Ireland (236,918 tons); Holland (221,061 tons); Panama (98,720 tons); British Dominions, etc. (81,393 tons); Italy (77,850 tons); and Sweden (73,732 tons). Owing to the difficulty experienced in obtaining precise information in the case of Soviet Russia, the figures given for that country may not be comprehensive.

The largest decreases amongst the principal maritime countries are the following, viz.:—United States of America—Sea (421,047 tons); China (127,250 tons); and Spain (95,572 tons).

The preceding Table shows that from June, 1914, to June, 1938, the net increase in the world's steam and motor tonnage was 21,466,274 tons, equal to 47·3 per cent. of such tonnage in existence in 1914, and that the net addition in the number of vessels was 4,965.

Since June, 1914, there has been a *net* decrease in the steam and motor tonnage belonging to Great Britain and Ireland of 1,216,685 tons, or 6·4 per cent. of the tonnage owned in 1914, while the number of ships has decreased by 1,744 during the same period. In the British Dominions, Colonies, etc., there has been an increase of 1,412,069 tons (86·5 per cent.) and 682 vessels since 1914; so that the totals for the British Empire at June, 1938, compared with those at June, 1914, show an increase of 195,384 tons (1·0 per cent.), but a decrease of 1,062 vessels. The aggregate increase of tonnage owned in other countries during the same period represents more than 85 per cent. of the pre-war tonnage owned.

Further comparison of the figures of other countries for 1914 and 1938 shows that the largest increases took place in the United States—Sea (6,909,557 tons), Japan (3,298,326 tons), Norway (2,655,822 tons), Italy (1,828,517 tons), Holland (1,380,302 tons), Greece (1,068,408 tons), and France (958,497 tons). The only decrease during this period, other than in Great Britain and Ireland, was that in the case of Germany, where, although the number of vessels has increased by 231, the present total tonnage is still 903,063 tons below that for June, 1914.

The present century has witnessed unprecedented development in the mercantile fleets of the world, the steam and motor tonnage having increased from 24,009,000 tons in 1901 to 66,870,000 tons in 1938. In the case of Great Britain and Ireland the figures have risen from 12,053,000 tons to 17,675,000 tons, and the concurrent increase in the tonnage owned abroad is indicated in the following Table, comprising the eight leading countries:—

COUNTRY.	Percentage of Steam and Motor Tonnage owned in the World, 1901 1914 1938			COUNTRY.	Percentage of Steam and Motor Tonnage owned in the World, 1901 1914 1938					
	GREAT BRITAIN & IRELAND	UNITED STATES (Sea)	JAPAN	NORWAY	GERMANY	ITALY	FRANCE	HOLLAND		
50·2	41·6	26·4			10·1	11·3	6·3
...	4·2	4·5	13·4		2·7	3·1	4·9
...	...	2·2	3·8	7·5	4·4	4·2	4·3
...	...	3·4	4·3	6·9	2·1	3·2	4·3

Of these leading countries it will be seen that, apart from Great Britain and Ireland, France was the only one to show a decrease in the proportion of tonnage owned during the period 1901–1914, and that since 1914 Great Britain & Ireland and Germany alone show a decrease.

TONNAGE OF SAILING VESSELS, NON-PROPELLED BARGES, ETC.

The reduction in the tonnage of sailing vessels and non-propelled barges, etc., since pre-war times, say June, 1914, is about 3,000,000 tons gross. The present proportion of such tonnage to the world's total tonnage is less than 1·5 per cent. Of the world's tonnage of such sailing vessels and barges, 535,000 tons (54·8 per cent. of the total) are now under the United States flag, and the other countries which still have an appreciable amount of similar tonnage are: Great Britain and Ireland, 105,000 tons; Canada, 81,000 tons; Finland, 37,000 tons; Italy, 31,000 tons; and France, 23,000 tons.

If barges, the majority of which are generally towed, and other craft included in the sailing tonnage because not fitted with engines for self-propulsion, be excluded, the world tonnage of sailing vessels amounts only to some 259,000 tons, of which 62,000 tons (23·8 per cent. of the total) belong to the United States, 37,000 tons are owned in Finland, 31,000 tons in Italy, 17,000 tons in Canada (Coast), 12,000 tons in France, 11,000 tons in Great Britain and Ireland, and 10,000 tons in Portugal. It may be of interest to state that there are still recorded in the Register Book 5 sailing vessels of between 3,000 and 3,200 tons gross each.

SIZE AND AGE OF STEAMERS AND MOTORSHIPS.

A considerable increase has taken place in recent years in the number of *sea-going* steamers and motorships of 4,000 tons and above. In 1914 there were 3,608 such vessels, and now the number reaches 6,426, of which 540 are of 10,000 tons and above, including 77 of 20,000 tons each and upwards. Of the 540 vessels, 253 are under the British flag.

It may be noted that over one-half of the total number of steamers and motorships recorded in Lloyd's Register Book are of less than 1,000 tons each.

Table No. 8 shows that of the motorships now in existence in the world there are 1,681 of 4,000 tons and above. Three hundred and sixty-six of them are between 8,000 and 10,000 tons each, and 199 are of 10,000 tons and upwards.

From Table No. 5, in which steamers and motorships are classified according to their size and age, it will be noticed that there are 3,269 vessels less than five years old, with a tonnage representing 12·9 per cent. of the total steam and motor tonnage. Vessels of 25 years and over amount to 9,571, with an average tonnage of 1,377 tons, compared with 2,643 tons for those under five years of age.

Of the 1,317 vessels of 8,000 tons and upwards now in existence, 284 have been built during the last five years.

Of the tonnage owned in Great Britain and Ireland, 18·0 per cent. is less than five years old. Of the principal maritime countries abroad, those having the largest proportion of new tonnage (less than five years old), are Japan with 23·6 per cent., Australia and New Zealand together, with 22·7 per cent., Norway with 21·9 per cent., Holland with 19·1 per cent., Germany with 17·0 per cent., Denmark with 13·8 per cent., Sweden with 13·7 per cent., and France with 11·0 per cent. On the other hand, Spain has but 4·3 per cent., while of the United States sea-going tonnage 4·1 per cent., of Greek tonnage, 3·1 per cent., of Canadian tonnage, 1·2 per cent., and of Italian tonnage only 1·0 per cent. is under five years old.

Of the tonnage registered in Great Britain and Ireland, 79·2 per cent. is *under* 20 years old and 56·8 per cent. is *under* 15 years old; while the corresponding percentages for the tonnage owned abroad are 63·7 and 35·0 per cent.

The size-group of vessels with the largest aggregate of tonnage is that from 4,000 to 6,000 tons, comprising 17,962,566 tons, equal to 26·9 per cent. of the world's total steam and motor tonnage. Vessels of 15,000 tons each and upwards represent only 5·8 per cent. of the total tonnage; it may be noted, however, that upwards of 45 per cent. of such tonnage is registered in Great Britain and Ireland.

TYPE OF MACHINERY.

Table No. 3 gives particulars of the number and gross tonnage of steamers and motorships according to the type of machinery used for their propulsion, and the following summary is of interest:—

The figures show the extent of the great development which has taken place in the use of steam turbine engines and of internal combustion engines. There are now 1,865 steamers of 12,141,535 tons fitted with turbine engines or a combination of steam turbines and reciprocating engines, and 6,912 vessels (including auxiliary vessels) of 15,232,953 tons, fitted with internal combustion engines, as compared with 730,000 tons and 234,000 tons respectively in 1914.

While during the last twelve months there has been an increase of 1,484,000 tons in the tonnage of motorships, and of 139,000 tons in the tonnage of vessels fitted with steam turbines, there has been a reduction of 279,000 tons in steamers fitted solely with reciprocating steam engines. Since June, 1925, there has been an increase of 12,519,000 tons in the motorship tonnage.

It will be observed that of 10,715,680 tons of Oil Tankers, excluding vessels of less than 1,000 tons gross, 5,408,974 tons are steamers and 5,306,706 tons are vessels fitted with internal combustion engines.

Although the total motor tonnage amounts only to 22·5 per cent. of the aggregate tonnage owned in the world, and, in the case of Great Britain and Ireland, to 22·8 per cent. of the tonnage registered there, the highest percentages among the principal maritime countries are to be found in the following, viz.: Norway, 59·5, Denmark, 49·1, Sweden 44·8, and Holland, 43·0; whereas Greece, the United States and France have the smallest proportions of motor tonnage, viz.: 1·1, 6·4 and 11·9 per cent. respectively.

An analysis of the type of machinery now employed also shows that there are recorded in Lloyd's Register Book 601 vessels, with a total tonnage of 2,701,651 tons which are fitted with a combination of steam turbines and reciprocating engines. Another interesting particular is that in the case of 110 vessels,

with a tonnage of 644,990 tons, electric propulsion has been adopted, the motors being supplied with current from generators which are driven either by steam turbines or oil engines. It may be added that auxiliary electric drive has also been adopted in a number of other cases. Of the 110 vessels mentioned above, 60 of 277,993 tons are owned in the United States. Of vessels exceeding 20,000 tons gross in which electric propulsion is employed, five fly the British Flag, and one is owned in each of the following countries, viz.: France, Germany and the United States.

Of the 29,409 steamers and motorships of 100 tons gross and upwards recorded in Lloyd's Register Book, 3,812 are twin-screw vessels, and 105 have triple or quadruple screws.

Although few paddle steamers are now built, there are still in existence and recorded in Lloyd's Register Book 295 such vessels, of 211,332 tons.

COAL AND OIL FUEL.

From Table No. 4, it will be seen that there are recorded in the new Register Book 4,023 steamers of 20,058,452 tons fitted for burning oil fuel, of which 822 of 5,218,412 tons are registered in Great Britain and Ireland, and 1,431 of 7,507,220 tons are registered in the United States of America.

The above figures, in conjunction with those given in the preceding section, enable a comparison to be made between the respective employment of coal and oil fuel at the present time as compared with 1914.

	1914 Percentage of total gross tonnage.	1938 Percentage of total gross tonnage.
Coal	88.84	46.54
Oil fuel for boilers	2.65	29.57
Oil, etc., in internal combustion engines	0.45	22.45
Sailing vessels, non-prop. barges, etc.	8.06	1.44
	100.00	100.00

It will thus be seen that well under 50 per cent. of the tonnage of the World's Merchant Marine now depends entirely upon coal, while in 1914 the percentage was nearly 89. The tonnage of steamers using coal which in 1914 reached 43,860,000 tons is now 31,579,000 tons, or, more than 12 million tons less.

It should, of course, be understood that oil is not necessarily always used in steamers fitted for burning oil fuel, as in a number of cases coal-burning fittings can readily be substituted when occasion demands the use of coal in preference to oil.

TYPE OF VESSELS.

The Tables show the total tonnage of certain types of vessels, and this information is of great service in enabling an estimate to be made of the tonnage available for *general cargo and passenger purposes*. The tonnage of the 1,655 oil tankers, of 1,000 tons gross and upwards, amounts to 10,715,680 tons; 410 of 2,672,219 tons are registered in Great Britain and Ireland, 418 of 2,759,642 tons are registered in the United States, and 262 of 1,972,469 tons in Norway. In addition, there are 138,776 tons of tankers of less than 1,000 tons each. The tonnage of steam and motor trawlers and other fishing vessels and whalers amounts to 1,173,056 tons. An analysis of the vessels recorded in the Register Book shows that 416,527 tons represent tugs and salvage vessels; ferries amount to 238,715 tons; cable vessels to 65,044 tons; while river vessels and vessels owned by Municipal Corporations or Harbour Authorities, and steam barges, dredgers and similar craft, amount to 524,462 tons.

It will thus be seen that, without taking into account size, age or material, there are about 13,275,000 tons of vessels which are not used for ordinary cargo and passenger purposes.

**NUMBER AND TONNAGE OF OCEAN-GOING STEAMERS AND MOTORSHIPS AVAILABLE FOR
GENERAL CARGO AND PASSENGER PURPOSES.**

If all vessels of the types mentioned in the preceding paragraph be omitted, and disregarding also

(a) Vessels trading on the Great Lakes of North America,

(b) Wooden and composite vessels,

(c) Vessels of less than 4,000 tons gross, and

(d) Vessels of 25 years of age and upwards, presumably of less efficiency than more modern vessels (*with the exception of a few, built earlier than 1914, which are still capable of a high speed*),

the following figures are obtained which indicate the relative position of the principal maritime countries as regards the more efficient ocean-going vessels available for general cargo and passenger purposes.

WORLD TOTALS ...	29,409	66,870,151	100·00	4,469	30,183,946	100·00

The above Table shows the relatively high efficiency of the merchant fleet of Great Britain and Ireland, which, while including 26·43 per cent. of the World steam and motor tonnage as recorded in the Register Book, actually comprises 35·88 per cent. of the more efficient ocean-going tonnage available for general cargo and passenger purposes.

Further comparison of the ocean-going tonnage, as defined above, with the total steam and motor tonnage owned, shows the following differences in percentage of the World totals, viz.:—Germany (+1·74%), Japan (+0·92%), Holland (+0·89%), Italy (+0·87%), France (+0·84%), Norway (-2·93%) and the United States (-2·06%). The reductions noted for the two latter countries are, of course, due to the very large proportion of oil tanker tonnage included in their respective merchant fleets, and also in the case of the United States, to the considerable tonnage trading on the Great Lakes, such tonnage being deducted for the purposes of the second part of this Table.

TONNAGE OWNED IN THE WORLD AT VARIOUS DATES.

Another Table, clearly illustrating the development of the Merchant Navies during the last thirty-five years, is Table No. 10, which shows for each of the years, 1904–1938 the number and the gross tonnage of the steamers and motorships, and of the sailing vessels, owned in the world, distinguishing also the principal maritime countries.

From this Table some remarkable variations can be observed. In 1904 the gross tonnage of steamers amounted to 28,633,000 tons, and the gross tonnage of sailing vessels to about 6,591,000 tons. Since then, the steam and motor tonnage has increased by more than 38 million tons, while the sailing tonnage has decreased by more than five-and-a-half million tons. Apart from the enormous increase which took place in the United States sea-going steam and motor tonnage from 1916 to 1922, and the decrease, during the period 1914–1920, in the German tonnage, both due to the War, the following are the most noticeable changes during the thirty-five years:—

The sail tonnage registered in Great Britain and Ireland and in Norway, which in 1904 amounted to about 1,504,000 tons gross and 756,000 tons gross respectively, is now reduced to about 105,000 tons (mostly non-propelled barges, etc.) and 800 tons, respectively.

The increase in the steam and motor tonnage owned in Great Britain and Ireland amounts to 3,676,000 tons. As compared with 1904, the most notable increases in steam and motor tonnage owned are shown at the present time by the following countries, viz.: Japan, with a tonnage now equal to 7·5 times the earlier figures; United States, 6·8 times; Greece, 5·4 times; Norway, 4·5 times; Italy, 4·5 times; and Holland, 4·4 times.

TONNAGE LOST AND BROKEN UP.

The Statistical Tables include one (No. 14) showing the tonnage of steamers and motorships lost and broken up in each calendar year from 1914 onwards. As regards losses one point deserves special mention, and that is the considerable decrease in the percentage lost during the last five years as compared with the pre-war quinquennial period. The average yearly percentage of steam and motor tonnage lost during the years 1933–37 amounts only to 0·55 per cent., whereas during the years 1909–13, for instance, the average was 1·17 per cent. Apart from the improvement in means of communication and safety appliances generally, these figures may, of course, be influenced to some extent by the large amount of tonnage laid up during recent times.

The figures for steamers and motorships broken up vary to a very large extent from year to year. During the period 1905–1914 the minimum was 87,737 tons, and the maximum 251,900 tons. During the years 1915–1920 practically no tonnage was broken up, the yearly average only amounting to 10,000 tons. Quite different conditions are shown for recent years. During 1921 the tonnage broken up amounted to 77,500 tons; it increased to 315,000 tons for 1922, and to 963,000 tons for 1923, since which year it has kept at a high level with the exception of the year 1927. From 1930 the figure rose sharply until 1933, when the two-million mark was passed. During the last four years the totals have rapidly decreased, and the 587,823 tons broken up during 1937 is, with the exception of 1927, the lowest annual figure recorded since 1922. It is 790,000 tons less than the yearly average for the last five years, and 590,000 tons less than that for the ten-year period 1928–37.

The aggregate steam and motor tonnage broken up during these ten years—**11,779,000 tons**—represents a yearly average of 1·7 per cent. of the tonnage owned. Adding to these figures the tonnage of steamers and motorships lost through casualties during the same period—**3,771,000 tons**—it will be seen that the average wastage of sea-going merchant tonnage (excluding sailing vessels) is less than **2·5 per cent. per year of the tonnage owned**.

The total figures for tonnage broken up during the ten years include 3,807,000 tons registered in Great Britain and Ireland; 2,046,000 tons in the United States (excluding Lake vessels); 1,245,000 tons in Italy; 891,000 tons in France; 604,000 tons in Germany; and 572,000 tons in Japan.

As regards Great Britain and Ireland the tonnage broken up during this period represents a yearly average of 2·0 per cent. of the tonnage owned, as compared with 1·6 per cent. in respect of tonnage owned abroad. It is to be noted, further, that of the tonnage now owned in Great Britain and Ireland only 20·8 per cent. consists of vessels of 20 years of age and above, whereas of the tonnage owned abroad 36·3 per cent. consists of vessels of such age.

Sailing vessels fitted with auxiliary power are included in the figures indicated for Steamers or Motorships, according to the type of the auxiliary engines.

Reinforced Concrete vessels are included in the figures shown for steel.

The Register Book includes a certain number of vessels which, although not actually completed at the date of printing, are expected to be completed in the near future.

Vessels of the following descriptions are not recorded in Lloyd's Register Book, and are therefore not included in the Tables, viz.: vessels trading on the Caspian Sea; *Wood* or *Composite* vessels trading on the Great Lakes of North America; *Wood* or *Composite* vessels under 300 tons gross, with auxiliary power, owned in Japan; and Sailing vessels owned in Greece, Japan, Southern Russia and Turkey.

NOTES GÉNÉRALES RELATIVES AUX TABLEAUX STATISTIQUES.

Tous ces Tableaux sont basés sur le tonnage *brut*.

Les vapeurs et navires à moteurs d'un tonnage *brut* inférieur à 100 tonneaux et les voiliers d'un tonnage *net* inférieur à 100 tonneaux, ne sont pas compris dans ces Tableaux, exception faite des Tableaux 6, 7, et 9.

Les navires à voiles munis de machines auxiliaires sont compris dans les chiffres indiqués pour les vapeurs ou navires à moteurs, suivant le type des machines auxiliaires.

Les navires en béton armé sont inclus dans les chiffres des navires en acier.

Le "Register Book" comprend un certain nombre de navires qui n'étaient pas encore achevés à l'époque de l'impression de l'ouvrage, mais dont on prévoit l'achèvement prochain.

Les navires mentionnés ci-dessous ne figurent pas au "Lloyd's Register Book" et ne sont par conséquent pas compris dans les Tableaux, à savoir: les navires naviguant sur la Mer Caspienne; les navires *en bois* ou *composite* naviguant sur les Grands Lacs de l'Amérique du Nord; les navires *en bois* ou *composite* de moins de 300 tonneaux brut, munis de machines auxiliaires et appartenant au Japon; et les navires à voiles appartenant à la Grèce, au Japon, au Sud de la Russie et à la Turquie.

Sous l'en-tête "Country not stated" (Pays non indiqué) sont compris tous les navires qui figurent au "Lloyd's Register Book" sans indication de pavillon, vu que des renseignements positifs à ce sujet ne se trouvaient pas en possession de la Société à l'époque de l'impression de l'ouvrage.
